

PSA FAQ's

1) What is the NCAA Eligibility Center?

The NCAA Eligibility Center (EC) determines a student-athlete's eligibility for athletics participation in his or her first year of college athletics. The EC certifies both the academic and amateurism status of a prospective student-athlete.

2) How Do I Register with the NCAA Eligibility Center?

Prospective student-athletes can go to www.ncaaeligibilitycenter.org to register, there will be a \$75 fee, that can be waived with all of the appropriate paper work. The Eligibility Center will require that your high school transcripts from each high school attended are sent directly from the high school to the NCAA Eligibility Center. Additionally your test scores (SAT and/or ACT) must be sent directly from the testing agency to the NCAA Eligibility Center. This can be done by entering the code 9999 when asked by the College Board through registration where you would like your test scores sent.

3) As a transfer student do I need to register with the Eligibility Center?

Yes. Any student-athlete that will enter a Division I or II institution for the first time must also register with the NCAA Eligibility Center. However, these transfer student-athletes may only have to complete the amateurism portion of the NCAA Eligibility Center. Please note that some transfer students may have to complete the academic portion of the Eligibility Center as your eligibility status out of HS may impact your eligibility status as a transfer student.

4) What is a Prospective Student Athlete?

A prospective student-athlete is a student who has started classes for the ninth grade.

5) What is the difference between an official visit and an unofficial visit?

An official visit is when a prospective student-athlete visits an institution at the expense of that institution. An unofficial visit is when a prospective student-athlete visits an institution at their own expense.

6) Where can I found out about the medicines I have to take?

The best resource for this is Brevard College's athletic training staff. They are more than willing to help you with any questions you may have about medicine or any type of supplement.
